

Lift And Rise Recliner LRR 201 Two Motor

Compo's twin-motor actuated has the following features:

- Full recline to flat position.
- Back and ottoman can be adjusted separately via separate motor
- Power lift for easy exit. Lifting actuator can provide up to 600kg lifting power.
- Special button to return the recliner to neutral sitting position from any position.
- Friendly remote switch that make adjustment easier for user.
- The holes position for the wood frame are identical to our standard WHR 101.
- The LRR mechanism is designed to take load up to 125kg mechanism.

Lift & Rise Two Motors 4 Action

Full-flat Reclining Action

Opening Action

Simultaneous Closing

Rising Position

LRR 201 (Without Safety Ottoman)

LRR 202 (With Safety Ottoman)

The LRR mechanism is designed to assist the user in rising from the sofa comfortably and safely. The total lift action is almost 524 mm and the tilt angle is 19⁰ degree from horizontal.

The back rest can reclined to almost bed like position.

The rising and lowering action is actuated via a switch which stop immediately once the finger is lifted from the switch.

The leg action and back rest action are controlled by separate motor.
